

Job Summary

Over 6 years of experience primarily in web application development. Strengths include “systematizing quality assurance” through static analysis, CI/CD, and test automation. As a backend engineer/tech lead, I build the team's quality foundation, contributing to improved development efficiency and code quality.

Skills

- English: Intermediate level in business English reading and writing (TOEIC 815, Eiken Grade Pre-1)
- TypeScript (NestJS, Vue3/Nuxt, React/React MUI, Storybook)
- Go
- PHP (Laravel)
- Java
- AWS (ECS, Cognito)
- Development Environment Improvement (Unit/Integration Test Automation, Strategic DDD)

Work Experience

DIP Corporation (Jan 2022 ~ Present)

- **HR Admin Panel Development** (Go/Next.js, 6 months)
 - Implemented static analysis and test automation → Reduced bug reporting rate by 20%
 - Built AI tool infrastructure → Enabled one member to generate 2-3 PRs per week via AI
- **Authentication Infrastructure Development** (Go/Cognito, 1 year)
 - Implemented integration testing → Reduced local verification effort by 50%
 - Led 5 partners → Released a 15,000-line product in 4 months
- **SPA Admin Panel Development** (Vue3/React, 2 year)
 - Implemented VRT and component testing → Improved component production efficiency by ~20%
- **Development of Management Dashboard for Job Ad Clients** (TypeScript, 6 months)
 - Led refactoring and mentored team members, improving coverage from 0% to 50% → Reduced launch bugs from 10 to 1
- **Technical Outreach**
 - New graduate training instructor (90-minute sessions × 2 types), 3 conference presentations (reached 300+ potential hires)

IDIOT Inc. (March 2021 ~ December 2021)

- **Backend Development** (PHP/Laravel)
 - Dockerized development environment, established testing infrastructure
 - Developed payment functionality, handled customer support (addressed 4 requests in 2 months)

SoftBrain Co., Ltd. (Apr 2020 ~ Mar 2021)

- **Backend Development** (Java)
 - Fixed bugs and performed testing for existing systems
